

Recommended Standardization Strategies: Albuquerque #1

1. Create testimonials that are inspiring and illustrate success. Testimonials from teachers and students.
2. Appropriate training and professional development that is meaningful.
3. Be selective about what you choose for standardization. High leverage.
4. Start relatively small. Leadership team mentors one or two at a time.
5. Synergize – work as a group and rely on the mutual support of the group.
6. Have the right to try things with some flexibility.
7. Work toward consensus at the start.
8. Take it slowly...resist the temptation to do everything at once and overwhelm people.
